Hi Linda,

Here is the second email and two additional attached photos that we received from our clients over the weekend.

Thank you.

Zak

"C" shows how close pond is to road; Anderson Environ Consulting map 9/28/2020 suggests pond is far off.

Other photo shows remains of wetland 29A.

Should one of us be contacting DEQ since EPA's attempt to contact the Corps hasn't yielded any results?

Steve
